Invitation

Greetings from the City Beautiful.

It is our proud privilege to welcome you all to the 1st National Conference & Pre-conference workshops of the Stillbirth Society of India at PGIMER, Chandigarh on August 12th and 13th, 2023. The Theme of the conference is ***Preventing Preventable Stillbirths.***

The conference focuses on stillbirth in the present Global and Indian perspective, pathological evaluation of a stillbirth, bereavement care and targeting the major causes of stillbirth. The pre-conference workshops on the 12th August include practical tips and hands on teaching by coveted teachers on Reducing intrapartum stillbirths- Improving Intrapartum care, Cardiotocography, Instrumental/ Breech delivery, Perinatal pathology and a Public forum for mothers and health professionals.

We cordially invite you to join us in this venture and look forward to your active participation in this academic event. Postgraduates will have the opportunity to participate in hands on learning of tools in intrapartum care, present research papers and win prizes in poster, paper presentation and Quiz.

We are excited to host the event and look forward to meeting you.

STILLBIRTH
SOCIETY OF INDIA

Stillbirth Society of India

Stillbirth society of India is a non-profit organization consisting of health care professionals, researchers, and individuals who have come together with the aim of reducing still births and improving care for families who experience such tragedies.

The stillbirth society of India is the first formal organization to be registered in India in affiliation to **International Stillbirth Alliance (ISA)**. The society aims to focus on different aspect of stillbirths, from data, guidelines, each causative factor to placental pathology & fetal autopsy. The society is much awaited need for the women of India who have lost and grieve the loss of their babies. Public awareness is lacking, the loss is still regarded as taboo; we need to start talking, inviting these women to be a part of change. A life shattering event for many couples which leads to depression and mental health issues. Bereavement care training to be supportive to these couples is needed.

Bringing together people from all aspects of maternity care in India, to share, discuss, learn, and prevent will impact the numbers.

We welcome all stake holders to come and join us, together we can do so much.

Preventing a stillbirth is lifetime of love and livelihood for a family !
